Homework, MA 213

2014-Sep-12

You may work with others to figure out how to do questions, and you are welcome to look for answers in the book, online, by talking to someone who had the course before, etc., but you must write the answers on your own. You must show your work.

1. Give the solution set of each system.

$$3x + 2y + z = 1$$

(a)
$$x - y + z = 2$$

 $5x + 5y + z = 0$

$$x + y - 2z = 0$$

(b)
$$\begin{array}{ccc} x - y & = -3 \\ 3x - y - 2z & = -6 \\ 2y - 2z & = 3 \end{array}$$

(c)
$$2x - y - z + w = 4$$

 $x + y + z = -1$

$$x + y - 2z = 0$$

$$(d) \quad x - y \qquad = -3$$

$$3x - y - 2z = 0$$

- 2. For the second system in the first question, give the associated homogeneous system and give its solution set.
- 3. Do Gauss-Jordan reduction.

$$x + y - z = 3$$

(a)
$$2x - y - z = 1$$

 $3x + y + 2z = 0$

$$x + y + 2z = 0$$

(b)
$$2x - y + z = 1$$

$$4x + y + 5z = 1$$
